

Reflection on our relationship with the Environment

What does the environment mean to you?

Is it really something that we can use and abuse for our benefit?

What about the responsibility that God has given us?

If we treat animals, plants, the landscape and water badly – does that point to the glory of God?

Does it affect our witness in the world?

Spend some time thinking through these questions

What about you?

What ONE thing could you do that will make a difference?

How will you change?
